

What's Happening To My Country?

My answer to that question is derived from a 2 year personal investigation to understand the reasons for the rapid decline of core American values.

Traditional principles seem to have been replaced by distorted concepts raising questions about the forces and methods driving this departure from long held beliefs.

America is facing a largely unrecognized existential threat to our democracy which I believe is a spiritual attack that has manifested itself in various deceptive forms. My paper will attempt to expose two dominant long-term strategies of Satan and demonstrate how they are destroying the founding principles of our great nation.

The origins of this cultural transformation can be directly traced to the 1960s and our public educational system. The shift from an historically proven educational model to a progressive framework has left my generation, and all subsequent ones, ill-equipped to make wise decisions about everyday life and unable to intelligently discern right from wrong.

Key to this ideological shift is the growing acceptance of various forms of socialism and Marxism which despite appearing to advocate for equity and inclusion, fundamentally undermine our moral framework. I believe this insidious ideology is a favorite "delivery system" of Satan to distort our traditional American beliefs about truth, morality, and virtue.

Without a deliberate acknowledgment of the spiritual struggle we face and a reaffirmation of the foundational values that shaped our nation, we face the danger of surrendering to ideologies devoid of our Christian faith. And, I'm convinced these ideologies have the potential to dismantle our cherished American dream and democratic principles.

Join me in exploring the pressing need to revive the cultural principles and beliefs held by our nation's Founding Fathers. Only by doing so can we protect our nation's fundamental identity and ensure its enduring existence."
